Online

Online is where you take your character and all of his winnings to play in online tournaments and matches.

Scenario Mode

Take your character into Scenario Mode to play in 9 different set up scenarios. You can unlock items in Scenario Mode that you can't unlock anywhere else in the game.

NEW CHARACTER

Before you can play a game, you will need to create a character. You can use a randomly created character or create your own character from scratch.

Cash Accounts: You start with \$1,000 for both online and offline play. Any progress you make or cash you win with a character will be saved to that character's account. Your offline career and online accounts are tied together, so if you take a beating online just relax and play some offline career games to win back your cash.

To create a character, select an "empty slot" from the character list. Now select your player's gender, body type and personality. If you want to see a random selection, press the Select button. Once you have selected the main attributes press the Start to continue to edit your character's face, body and clothing. You can spend as much time as you want adjusting your character. In the world of the poker pros, defining your look and style can be an important part of your game.

To complete your character, press the START button. Next, enter a name for your character. Pressing the START button again will prompt you to save your character. Once your character is saved, you're ready to play poker!

QUICK PLAY

This is the quickest way to launch a casual game of poker. The winnings or losses in this mode do not affect your character's statistics.

QUICK PLAY GAME OPTIONS:

Game Type: Select from a variety of different types of poker games. A detailed description of each game's rules appears in "The Games," below.

No Limit: Players may bet as much as they have in front of them.

Limit: Bets are set for each round.

Pot Limit: Player may bet as much as the amount of the pot.

Tournament: Tournament play allows you to play against a large number of players. The blinds are raised after a set amount of time.

Max Players: Choose the total number of players for your game. If you've selected tournament, you can have up to 600 people play. If tournament play is not selected the game is limited by table size. Casinos have tables with 8 seats, while other locations have tables with 6 seats.

Location: Choose where you want to play. Casino locations have a dealer and have 8 seats per table while pad locations let the players deal their own cards and have 6 seats per table.

Time: Select how long players have to make a decision before they are forced to fold.

CAREER

Your professional poker career starts here. Your poker adventure begins in week one (1), where you can play in 1 of 7 events. As your skills and bankroll grow, you will be able to select different events from the world overview. Some events may cost more than you can afford, but as your skills and bankroll grow, you will be able to enter those games. Each week a new set of venues opens for play. Many different game types are available to enter. Tournaments and Invitational's are games that have as many as 600 players playing at one time. These are long games, but the cash prizes are worth it.

Private games are games that you play at home with your friends. You don't need to finish these games, just make more than you bring to the table. These are great games to play if you are running low on cash and need a quick boost. Side games are like private games, but unlike your friends these players mean business. Keep an eye out for very special side games featuring heads up matches with poker pros. This is a great place to test your poker skills. Many of the side games, the tournaments and the invitational's offer bonus prizes as well as cash prizes. Since many matches overlap it will take you several weeks of play to collect all the prizes. Pick the games that suit your style of play.

YOUR PAD

When you start hosting private games you will play in your downtown apartment. As you gain money from playing, you eventually move to bigger homes in various locations around the map. There are five other pads you can upgrade to. In addition to those, the inside of your pad can be upgraded with new furniture and prizes. You want to make your pad look good because when you host an online game in your house, other players will see what you have.

Pawn Shop

The pawn shop is where you can buy new items for your pad and then sell them back when you need the cash. You can even take out a loan from the pawn shop with interest.

Skill Points

As you advance in your poker career you will become a more astute player and earn skill points. Skill points can be spent on increasing your poker playing skills. Some skills help directly with card playing, while others help with bluffing and telling. It is your choice on how you spend them.

Keen Eyes — This skill makes it increasingly easier to notice the bluffs and tells of other players. With a third rank in this skill after 25 hands this will tell you a player's play style.

Hand Strength — This skill will display your hand strength. First Rank displays Pre-flop strength. Second Rank constantly shows your hand strength. Third rank shows your hand strength and pot odds.

Stare Down — This skill will allow you to force a player to play the bluff/tell mini game. Each rank in this skill represents the number of times per hand you can perform this action. Note: To perform a stare down, on your turn press R2, and an eye icon will appear over the opponents HUD cards. Press **X** to activate the stare down.

Tough Read — This skill makes the mini game easier by slowing down the speed the ring rotates. Each rank will also decrease the chance of having to play the mini-game with a strong hand. A third rank will eliminate the mini game for strong hands.

Poker Face — Each rank in this skill will make effect the bluff tell mini games. The more you add to poker face, the easier it will be to achieve poker face when playing the mini game.

Luck — Luck gets used by way of your lucky charm. You will start out with 1 lucky charm (you can win more charms in side games) but you will need to assign a skill point to Luck to be able to use it. All lucky charms work the same way. You can use your lucky charm once each session (tournament or cash game). The amount of luck you have increases with each skill point assigned. You will get the following results when you use your lucky charm,

1 skill point assigned – If you are ahead in the hand at the time it is used, you will not be drawn out on.

2 skill points assigned – If you have 5 outs or more at the time it is used, you will win the hand by the river.

3 skill points assigned – If you have any outs in the deck at the time used, you will win the hand by the river. If there are no outs in the deck no amount of luck will help you win.

Bluff-Tell Mini Game

The green zone is for a poker-face.

The red zone is for a bluff.

The yellow zones will present a tell.

If you do nothing, a tell is given by default.

Flaunting cards

At the point you win a hand to a fold you will be given the option to “flaunt” your cards. Use this to show big bluffs to improve your reputation. Be careful though, if you flaunt a strong hand to a fold your opponent will gain confidence and your reputation will go down slightly. You can also flaunt your big lay downs by holding down the Triangle button when you fold. If you make a big lay down and you are beat your reputation will go up.

Multiplayer

To fully experience World Championship Poker: Featuring Howard Lederer ALL-IN, you will want to play online and test your skills against other players.

HOME ROUTER/FIREWALL CONFIGURATION INFORMATION

Crave Entertainment does not support the use of firewalls or routers for multiplayer online play. Because firewalls, routers and Internet sharing are increasingly common in the home network environment, the following configuration information is provided for advanced users who wish to customize their home network settings in order to accommodate online multiplayer play. CRAVE ENTERTAINMENT ASSUMES NO LIABILITY FOR DAMAGE RESULTING FROM THE CONNECTION OF ANY DEVICE TO THE PSP®(PlayStation®Portable) system, NOR THE LOSS OF DATA OR OTHER PROBLEMS RESULTING FROM ANY CHANGES YOU MAKE TO YOUR EXISTING ROUTER/FIREWALL NETWORK SETTINGS.

World Championship Poker: Featuring Howard Lederer ALL-IN supports “NAT negotiation,” a system that tries to find open ports with firewalls and routers, allowing for a full game experience. This process may delay connections. To achieve the best performance, do not run World Championship Poker: Featuring Howard Lederer ALL-IN behind a firewall. It may take several minutes for video and voice chat to connect if you are playing behind a firewall. Note: Gameplay will continue as normal while video and voice chat connects.

NAME YOUR GAME

As the host of an online game you will be able to set up custom home games to host in your pad. You will be able to totally customize the number of cards each player gets, the number of shared cards each player gets, the number of betting rounds and what cards are wild if any. This will give you the ability to recreate many of your favorite crazy home games.

ADD RULES OF MIX GAME STUFF

There are different kinds of mix games in poker. They are identified by an acronym used to help the player remember the order of the games. A popular version is H.O.R.S.E., in this case, the five games are:

- * H: Hold'em
- * O: Omaha Hi-Lo
- * R: Razz
- * S: Seven-card Stud high
- * E: Seven-card stud Eight or better, or hi-lo

If you are playing a H.O.R.S.E mix game, the game will change every time the dealer button makes a full round.

During each rotation each version of poker is played according to the rules of that game.

Erin Ness

In 2005 Erin attracted the poker world's attention by becoming the third highest placing woman in the main event of the World Series of Poker. She earned her seat in the tournament by winning a company poker tournament at Maxim Magazine, where she works as a photo producer. Subsequent to her finish at the WSOP she competed in the televised Poker Royale: Young Bloods tournament where she placed second to David Williams. Erin still continues her day job at Maxim, but tries to play poker as often as she can. www.erinness.com

Marcel Luske "The Flying Dutchman"
